

RMLink[®]

“Bridging the Gap between Configuration and Requirements Management”

RMLink[®]

Requirements Management Link better known as RMLink[®] is an essential middleware product that facilitates the communication between Telelogic's DOORS[®] Server and PTC's Windchill Server. RMLink[®] provides an intuitive web-based user interface that allows your project management and development teams to retrieve CM and RM information within seconds. RMLink[®] is loaded with features that are essential to the success of your project management and development teams. The capabilities and benefits that RMLink[®] provides are the tools needed to keep your PLM Team on track, focused, and aligned.

Capabilities

- View a DOORS Module.
- View DOORS attributes and extended attributes
- View relationships the requirement shares with objects in Windchill
- View In/Out links and associated Change Proposals.
- View a DOORS folder/project hierarchy.
- View an individual Requirement and its attributes
- Keyword Search the DOORS database for specific Requirements.
- Download the Requirement text In MS Word with track changes enabled
- Link DOORS Requirements to Windchill documents and parts.
- Map Windchill Containers to DOORS Databases.
- Integration with the Windchill Change2 system.
- Ability to have versioned Change Request.
- Submit a DOORS Issue to the Change2 system as a piece of Affected Data.
- The DOORS Issue is an iterated object that tracks From/To language changes providing traceability.
- Supports the creation of DOORS Change Proposals from the Windchill user interface.
- Configurable after-hours processing

Why is RMLink[®] the solution for your company?

Scalability

RMLink[®] is highly scalable and provides support for accessing multiple DOORS databases.

Performance

RMLink[®] offers superb caching availability. The RMLink[®] Queue Manager allows for immediate data processing and retrieval.

Redundancy

RMLink[®] ensures that your information will always be accessible. The RMLink[®] Client Manager allows your users to access and retrieve data at anytime.

STONEWORKS

SOFTWARE

Web-based User Interface

RMLink[®] provides an easy to use web-based interface that allows the user to navigate DOORS Projects, Modules, and Requirements.

Unified Access Control

RMLink[®] offers a new unified access control method for system administrators to easily map user accounts across multiple platforms.

Package-based Installer

RMLink[®] packaged-based installer allows System Administrators to easily deploy RMLink[®] Server, RMLink[®] Queue Managers, and the RMLink[®] Client Manager. The RMLink[®] installation package is offered in shrink wrap and click wrap packages. Regardless of your preferred installation method, the RMLink[®] Setup Wizard easily guides you through the install.

Rapid Deployment

Sometimes your deployment strategies call for a one stop solution. RMLink[®] is designed to integrate seamlessly into your network. However in some instances, network infrastructure may not be adequate or to scale for a rapid deployment. For situations such as this and Enterprise deployments, RMLink[®] is offered in a single server solution which is pre-configured by a Stoneworks Software Application Engineer prior to installation.
